

Fruit firework in the winter.

**Photo Exhibition by Nataliya Peregudova. Fruit Portraits.
28 November – 28 December 2007.**

At 28th of November in the Center of Culture and Arts of National Technical University of Ukraine starts a debut solo exhibition of Nataliya Peregudova. Visitors will be able to see more than 10 artworks printed in large canvas, the so called "still life portraits".

Photographer plays with characters and uses unusual metaphors, where the main role is obtained by fruits. But in the center of shot is always a person. Some works have a plot, which, according to Nataliya, lays at the palm before the spectator, and has a secondary role in artwork's perception. The main task of the photographer is to make viewers emotionally feel the warm and rage of colours, flowing from the artworks.

Photographs of Nataliya are fun and humorous. PhotoFunArt that is how the author describes the direction in which her works are established.

Here's what Nataliya tells about her unusual artwork theme:

"Have you ever associated somebody to a fruit? No? I did. I did it at least 10 times during the process of "Fruit Portrait" photoseries creation. I learnt lots about fruits and berries, for instance, I found out that the strawberry is a white-haired pretty thing and the cherries become ripen on the girl's breasts. People are fruits, very individual, with different taste."

Nataliya plays in fruit association - funny game with human nature and human essence. Her characters are romantic and bright and undoubtedly soften the winter's coming.

Nataliya Peregudova was born in Kiev. Graduated from National Technical University of Ukraine, Computer Science faculty. Except of the photocollage and digital photomanipulation she devotes lots of time to "pure" photography. Her first participation in international photo contest brought her a honorable mention (4-th place) in Nude & Glamour category at Venice International Photo Contest 2007.

Place of Exhibition:

Center of Culture and Arts of National Technical University of Ukraine,
Ukraine, Kiev, prospect Pobedy, 37
